

FrontEnd Programmer

PaySimple, voted one of the best places to work in Denver in both 2008 and 2009, is staffing up to support explosive growth in 2012! We are looking for a FrontEnd Programmer to become an integral member of our team. This is an exciting career opportunity and we're looking for a superstar to fill this role.

Job Description:

We're looking for a FrontEnd Programmer to manage multiple websites including our lead generation marketing website and our intranet. You'll have strong knowledge of html, css and solid knowledge of Javascript. A big plus if you are familiar with Modx content management system and website analytic tools.

You'll be tackling big & little projects that are fun, challenging and span the spectrum of front-end development. You will manage site development and enhancement through modification, integration, and configuration of CMS modules and components.

This is a great position for someone who enjoys working collaboratively with colleagues in the engineering and marketing teams to support website and intranet activities for our high growth organization. Since online marketing is the key enabler for our growth and an integral part of our revenue generation; this is a unique position to have a high level of impact in a truly high growth company.

Responsibilities:

This position will have overall responsibility for technical aspects of the company's websites and intranet site including:

- HTML/CSS coding and updating for website enhancements
- Javascript to build interactive interfaces
- Administer the CMS
- Maintenance of the proper function of the hosted websites
- Manage website integration with CRM infrastructure, marketing automation and other internal systems for critical data flow
- Interaction with engineering, marketing and design teams

Qualifications:

- Previous experience building and/or maintaining a CMS-based website (Modx experience a big plus)
- Working knowledge of PHP and MySQL, on the Microsoft platform
- Working knowledge of IIS7
- A strong understanding of modern web practices to create an efficient user-experience
- A good understanding of cross-browser issues & their workarounds
- Experience with browser compatibility (Chrome, Safari, IE)
- Ability to write standards based, semantic HTML & CSS & modern layouts using tableless design
- Ability to integrate website analytics
- Working knowledge of Javascript
