

Have you thought about offering credit card and echeck acceptance from within your app, your software, or your website but you don't want to build a payment API in house?

Our complete feature stack might be the answer you're looking for. Offer your customers the ability to: accept one-time payments, set up subscription billing and payment plans, as well as report on payment history—all within your platform, while you earn compounding revenue on their transactions.

- **Credit card rates as low as 2.49% + 29c**

Enjoy the peace of mind that comes with offering your customers the lowest rates available.

- **Low cost ACH rate of 0.1% + 60c**

Provide your customers more payment options, with the ability to offer low-cost echeck payment processing.

- **No integration fees**

Make an easier business decision; offer more to your customers with no added cost to you.

- **Straightforward and easy-to-code API**

Quickly expand your portfolio with an easy-to-implement payment API, including complete and [comprehensive documentation](#).

- **Revenue share opportunities**

As a valued PaySimple partner, you earn revenue for your business when your customers process transactions.

- **Local and real-time support**

Feel confident that you and your customers will be able to reach an award-winning customer service team by phone, email, or chat when assistance is needed.
